## **DETAILED ACTION**

### ***Response to Amendment***

1. The finality of the last office action is withdrawn in view of the following new ground of rejection.

### ***Allowable Subject Matter***

2. The indicated allowability of claims 23, 25, 26, 29, and 30 is withdrawn in view of the newly discovered reference(s) to Odenwalder US Patent No. 6,678,311. Rejections based on the newly cited reference(s) follow.

### ***Claim Objections***

3. Claims 23, 25, and 28 are objected to because of the following informalities: claim 23, line 4, "a sample stream" should be "said/the sample stream" so as to be consistent with antecedent in line 3. Claim 25, line 4, "an" should be "the/said" so as to be consistent with antecedent in line 2. Claim 28, lines 5, 7, and 10, "a common" should be "said/the common" so as to be consistent with antecedent in line 2.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

Art Unit: 2637

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 23, 25, 26, 29 and 30 are rejected under 35 U.S.C. 102(e) as being anticipated by Odenwalder US Patent S/N. 6,678,311.

Odenwalder discloses a method and apparatus (figs. 2, 5 and 6) having the steps of: accepting a sample stream from RF processing system 122; demodulating information channel (power control data, pilot data, and encoded data) in the sample stream using circuit element 182; supplying combiner channel assignments (note that outputs of each circuit 182 are considered as the claimed "combiner channel assignments") which includes soft symbol decision see col. 12, lines 28-33; "combiner channel assignment " (output of the demodulator) is supplied according to the demodulated information channel (power control data, pilot data, and encoded data) i.e. power control information, BPSK, QPSK; combiner 184 accepting "combiner channel assignments (output of the demodulator 182.

As per claim 25, an uncovering code (Walsh code) is accepted see fig. 6 and the demodulating demodulates the information channel in response to the uncovering code (Walsh code). See fig. 6.

As per claim 26, each information being covered with a Walsh code from a plurality of Walsh codes see fig. 4 and col. 6, table I; and wherein accepting an uncovering code includes accepting an uncovering code corresponding to the information to be demodulated. See fig. 6.

As per claim 29, the demodulating circuit includes a plurality of demodulating fingers and accepting the sample stream includes each demodulating finger accepting the sample stream see fig. 6 and wherein each demodulating finger demodulating information channels in the sample stream and supplying an output considered as the claimed "combiner channel assignment with soft symbols" see fig. 5 and col. 12, lines 28-33.

As per claim 30, each demodulating finger includes a plurality of finger channels see fig. 5 and wherein supplying said output (combiner channel assignments) with the soft symbols includes each finger channel supplying an output (combiner assignment) corresponding to the information being demodulated. See fig. 6.

***Allowable Subject Matter***

5. Claims 2-13 and 15-21 are allowed over the prior art of record.

6. Claims 24, 27, 28 and 31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jean B Corrielus whose telephone number is 571-272-3020. The examiner can normally be reached on Maxi-Flex.
